

LIVE! Casino Pittsburgh

DOBIL - CASE STUDY

Dobil was responsible for programming and installing building-wide Crestron Control, ZeeVee video distribution, and QSC Q-Sys audio systems within the new LIVE! Pittsburgh Casino in Greensburg, PA.

About Us

Dobil Laboratories, Inc. custom designs and installs large screen graphic projection, sound reinforcement, and sophisticated, easy-to-use integrated control systems. Our elite team of Crestron Certified programmers designs unique AV solutions for your space.

On November 13, 2020, Dobil completed a multi-million dollar project for LIVE! Casino Pittsburgh, installing audio and video to fully equip the new casino for opening day.

- \$2.3 Million Project
- 100,000 Sq Ft Space

The new 100,000-square-foot, two-level facility features 750 slot machines and about 30 table games, as well as the FanDuel Sportsbook. Live! Casino will feature nationally recognized restaurants and live entertainment venues.

The Video Breakdown

Dobil was responsible for controlling the Analog Way Multi-Window Videowall processor as well as the Analog Way Picture All processor, providing a multi-windowing capability in order to display 16 different sporting events, simultaneously, on both the large video wall as well as the video ribbon.

Two DJ Booths setup with Pioneer Elite DJ Controllers and a New Tek Tricaster controlling three Sony PTZ HD Cameras also reside within the high-tech casino.

Throughout Live! Casino Pittsburgh's main, front-of-house areas, all video and audio devices can be controlled by any one of the 23 Crestron Touch Panel controllers installed.

Challenge

When LIVE! Casino Pittsburgh decided to open within a large 100,000 foot space inside of the Westmoreland Mall, they needed to find a company who could meet all of their needs in both the audio and the video realm. With such a large space, limited time, and a vast array of technology needed, they were in search of someone who could create an amazing, modern atmosphere and do it well.

Solution

With Dobil offering specialized services for a large list of audio and video systems, the decision was made by LIVE! Casino Pittsburgh. Dobil would be installing the media and technology within the brand new casino.

The Audio Breakdown

Dobil was responsible for programming and controlling 112 zones of audio and a total of 396 high-quality Martin and QSC speakers in the front of house areas.

There are a total of 8 wireless microphones installed and used throughout the facility.

One live entertainment stage setup, located in the Sports and Social Bar included a complete stage package for live music performance.

The Feedback

“The Dobil team was a pleasure to work with on this project. They were consistently on the heels of construction and managed their schedule very well. Dobil’s engineering team was very proactive in finding efficiencies and better ways to handle the functions of the property. Even post-contract, they are very responsive and give us the feeling that they truly care about our property.”

- Ryan Dewey, LIVE! Casino Pittsburgh Director of Audio Visual

“It was very exciting to work with the Cordish Company and the Coherent Design Group on bringing their Audio Visual system’s vision to life throughout all of the different spaces within Live! Pittsburgh!”
